School Self-Evaluation Report 2013

A school self-evaluation report was carried out in Shrine NS in the area of numeracy in the 2013 school year.

The report found that the school was performing at/above average in standardised tests pertaining to the maths curriculum.

The report identified maths tables as an area of weakness and this was addressed in the 2013/2014 school year with the introduction of tables workbooks and related activities in class.

Regards,

Board of Management
